Phase II – Irrigation Alert

The Meridian Metropolitan District (MMD) is implementing Phase II of the Drought Response Plan. The storage volume in the irrigation reservoirs is projected to drop below 135 acre-feet of water.

Therefore, MMD is requesting all customers to:

- Limit outdoor watering to three-days per week.
- Do not water between 10 a.m. and 6 p.m.
- Consider delaying any new landscaping until after September 15, 2022.

As a part of Phase II procedures, MMD will:

- Limit irrigation on medians and in parks to a maximum of three-days per week.
- Reduce irrigation in all native areas.
- Delay installation of new District landscaping until after September 15, 2022.

Our hope is that these measures will help us avoid more stringent restrictions going forward. Please visit www.meridiandistrict.com/water-services for more information.
